

TRUSTWAVE SECURE EMAIL GATEWAY CLOUD

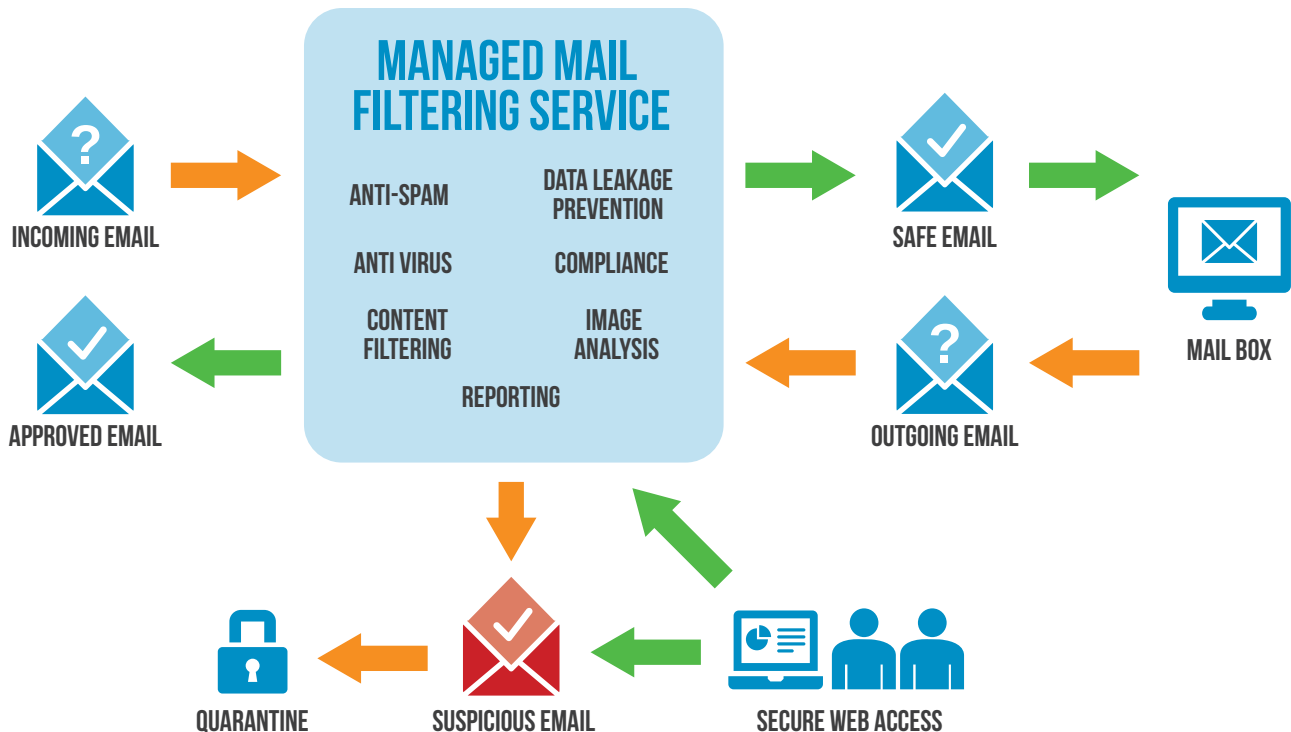

COMPLETE EMAIL PROTECTION, DELIVERED IN THE CLOUD

Built on the award-winning Trustwave Secure Email Gateway, Trustwave SEG Cloud provides protection at the internet level, eliminates threats before they reach the network and provides centralized security in distributed environments. Trustwave SEG Cloud reduces business costs, complexity and uncertainty while delivering advanced protection against modern threats, unmatched policy configuration and in-depth data security and compliance management.

- Reduce complexity and uncertainty
- SLA-backed protection and uptime
- Advanced security protection before threats can reach the corporate network
- Reduced business costs
- Retain full control of policies, configuration and reporting

KEY BENEFITS OF TRUSTWAVE SEG CLOUD

- **Simplified Management**
Eliminate the overhead of software upgrades and hardware management while maintaining full control over your email policies
- **Reduced Costs**
Realize savings through reduced storage and bandwidth needs and less time spent on administration
- **Advanced Security**
Gain industry leading protection against phishing, blended and targeted threats
- **Web-based Management**
Role-based access controls along with granular auditing capability

HOW IT WORKS

Protecting the network with Trustwave SEG Cloud is fast and easy. Simply point your MX records to the Trustwave data centers, and all inbound email is inspected before it reaches your network, providing industry leading protection against phishing, blended and targeted threats – and enabling significant bandwidth and storage savings.

Trustwave SEG Cloud analyzes, manages and controls outbound content to provide full DLP level inspection on emails and attachments to effectively manage confidential data and help meet stringent regulatory requirements.

Trustwave data centers are load-balanced, redundant and highly available clusters to provide 99.9% uptime. Backed by industry-leading service level agreements (SLAs), Trustwave SEG Cloud eliminates uncertainty and complexity and delivers the highest degree of protection.

SERVICE-LEVEL COMMITMENTS

Trustwave provides industry-leading SLAs to ensure the service performs to the highest levels, including 99.9% uptime, 99.5% spam blocking rates and 100% detection of known viruses

“Email is secured and network bandwidth is optimized – with more than 70 percent of incoming email identified as spam and blocked before it hits the network gateway.”

Karen Graham
SVP and COO
Crest Savings Bank

FLEXIBLE SERVICE OPTIONS

Services	Features
Standard Protection	Industry leading anti-spam and anti-virus protection
